

Final Seminar May 14-16, 2019

Tuesday May 14th

10.00 *Coffee and registration*

11.00 *Welcome! The conference starts.*

The archipelago and the biological cultural heritage.

Participating Tommy Ek, the Swedish Environmental Protection Agency and project members

Project management a reflection - project economist and project manager

12.30 Lunch

Lighter forests, fast results with nature conservation burning, harvesting of uniform forest holdings, veteranisation with arborists and pollarding of many trees.

Grasslands with species richness results from grassland restoration, dependent species - how quickly do they return?

14.30 - 15.00 Coffee break

Wetlands and coastal meadows - construction of wetlands, machine actions on meadows and returning birds. Fast processes with clear results! Birds and new pastures!

Birds and islets how about the coastal birds? What has the project contributed to? Expert Lars Gezelius gives his picture of how it goes for the birds in the archipelago.

Mink hunting - how did it work to build a hunting organization? How do you actually do when chasing mink? We want to prevent single mink from destroying whole bird colonies during breeding time.

16.35 - 17.00 *Presentation of the field day* and practical instructions for conference dinner

18.30 *Conference dinner* at the Work Museum, Restaurant Laxholmen

Wednesday May 15th

Travel 1 Södermanland Archipelago environments, long boat trip

Travel 2 Östergötland Archipelago environments, long boat trip

Travel 3 Östergötland tree care / insects, only short boat transport

Thursday May 16th

8.00 Lectures

Ecosystem services in Life Coast Benefit

Pollination Magnus Stenmark PhD, inspirational lecture on how pollinators use the landscape.

9.30 - 10.00 Coffee break

Socio-economic effects of the project

The project's success factors - panel debate

Visitor experiences in project areas

Final summary

12.30 Lunch
